Wireless Setup

Windows Mobile 6.x

Configuring eduroam - Windows Mobile 6.x touch-phone devices
Configuration steps
This describes the configuration on Windows Mobile devices running Windows Mobile 6.x.
Make sure that you have your credentials ready and setup
- Select **Start** then **Settings** then **Connections** then **Wireless LAN** then **Turn on Wireless LAN**
- On the Wireless LAN **Main** tab select **Change Network**
- From the list of available networks choose **eduroam**
- Your device will ask you to configure the Wireless Network
  - Check **Network name** is **eduroam**
  - Set **Connects to** to **The Internet**

  then select **Next**
- On the first **Configure Network Authentication** page
  - Set **Authentication** to **WPA2**
  - Set **Data Encryption** to **AES**

  then select **Next**

- On the next **Configure Network Authentication** page
  - set **EAP type** to **PEAP**
    - **(MSCHAPv2)**

  then select **Finish**
- The device will then try to connect to the eduroam network. At the **User Logon** page
  - enter your **UMID@eduroam.umaryland.edu**

    For example: jdoe@eduroam.umaryland.edu
  - enter your **UMID password**
- After a few moments, your device should report that it is connected to the eduroam service.
